

Víctor Capdevila Rodríguez

JUNIOR SOC ANALYST | CYBERSECURITY SPECIALIST | FULL-STACK DEVELOPER

Cybersecurity Specialist with an architectural foundation in Full-Stack Web Development. Graduate of the Cybersecurity Specialization Course, with demonstrable practical experience in digital forensics, network and infrastructure hardening, and ethical hacking. I bring a differential analytical capacity to understand software topologies from their source code, allowing me to identify underlying logical vulnerabilities and apply Secure Coding methodologies in CI/CD pipelines. Oriented towards integration in Security Operations (SOC) and technical application auditing for proactive risk mitigation.

Phone: +34 691648517 | Email: capdevilaavictorr@gmail.com | LinkedIn: [victor-capdevila-rodriguez](#) | GitHub: [vilacprd](#)

TECHNICAL SKILLS

- **Offensive Security & Auditing (Red Team):** Web Security (Burp Suite), Offensive Security (Metasploit Framework), Network Analysis & Reconnaissance (Nmap).
- **Defensive Security & Forensics (Blue Team):** Network Traffic Analysis (Wireshark), Forensics (Autopsy, Volatility).
- **Reverse Engineering:** x64dbg, Detect It Easy, Ghidra.
- **Software Development:** Java, Python (Security Scripting & Automation), Node.js, HTML, JavaScript, React, Tailwind CSS.
- **Tools & OS:** Advanced Linux (Arch Linux, CachyOS, Parrot OS, Kali Linux), Docker, Power BI, Git, GitHub.
- **Methodologies:** Scrum, Agile teamwork.

WORK EXPERIENCE

SYSTEMS AND DATA ANALYST (INTERNSHIP) | FIDESOL (TECHNOLOGICAL RESEARCH CENTER)

Oct 2024 – Jan 2025

- Actively participated in the maintenance and development lifecycle of software infrastructures operating under a high-level technological R&D environment, integrated into Agile development methodologies (Scrum).
- Engineered and deployed advanced analytical dashboards using Power BI, extracting, modeling, and correlating complex data flows to ensure information integrity and provide business intelligence for strategic decision-making processes.
- Gained operational exposure to advanced technological architectures and innovative research ecosystems (entity participating in national security projects such as the Cervera CICERO Network).

KEY PROJECTS

FULL-STACK RESTAURANT ORDER MANAGEMENT APP

- Designed and deployed a complete Full-Stack architecture utilizing Node.js and Express for the backend REST API, coupled with Sequelize ORM for scalable relational database management (MySQL/PostgreSQL).
- Engineered a highly responsive frontend interface using React and Tailwind CSS, tailored to optimize kitchen workflows with dynamic order customization and ingredient stock tracking.
- Implemented robust API endpoints for comprehensive CRUD operations across product catalogs, integrating multer for secure server-side file upload management and image handling.
- Established clean code practices and modular repository architecture using Git/GitHub, delivering comprehensive technical documentation to facilitate future deployments.

EDUCATION

SPECIALISATION COURSE IN CYBERSECURITY IN I.T.

FP Mercedarias - 2025-2026

ADVANCED TECHNICIAN DEGREE IN WEB APPLICATION DEVELOPMENT

IES Zaidín Vergeles - 2021-2024

PROFESSIONAL MUSIC STUDIES (VIOLIN)

Conservatorio profesional Ángel Barrios – 2010-2023

LANGUAGES

- Spanish - Native language
- English - Level B2

SOFT SKILLS

- **High-Performance Analytical Discipline:** Complex pattern recognition, resilience in iterative problem solving, and sustained long-term commitment; cognitive competencies forged and empirically demonstrated through 13 years of uninterrupted professional classical Violin studies.
- **Methodological Adaptability:** Agile teamwork, technical communication, and adaptability to continuous learning.
